To: Paul Baker <paulbaker@utah.gov>

I just spoke with Duane Bays (BLM-Fillmore), who said that the BLM Utah State Office is doing a mineral exam on the Red Dome cinders to see if they are locatable or not.

He also said that they have a 3-yr bond re-evaluation time line, and that this is the year. So they have spoken with Jason at the mine, and let them know. Duane is somewhat aware of Red Dome's concerns with our Division in the past. I told him the status of our permit, and that we have worked on getting better maps, but that's as far as we have gone. So we'll probably have a bond to review at some point.

The land status maps on the Google Earth .kml file show that most of the mine is BLM. I was under the impression that significant parts were private for some reason...

So there are some potentially big issues for them.

Peter
